

PRODUCT DATA – LA-486 PLASTISOL

This formulation is a self-adhering plastisol formulated to have a low viscosity for use in coating and sealing applications. Once applied to a substrate and installed the parts should perform well from 0-165F. Temperatures outside this range may be acceptable, depending on the forces applied to the coating. Not recommended for contact with ABS or Polystyrene. Testing is recommended for sealing applications as performance can vary with factors such as installation temperature, torque, etc.

TYPICAL PHYSICAL PROPERTIES

Durometer Shore A	ASTM D2240	87+/-5
Tensile Strength	ASTM D638	720psi min.
Percent Elongation	ASTM D412	160% min.
Tear Strength	ASTM D624	160lbs/in min.

NON WARRANTY: Since Lakeside Plastics, Inc. has no control over the conditions under which its products may be employed; and since information as to the physiological and other properties of its products is incomplete, Lakeside Plastics cannot guarantee the results obtained and assumes no liability whatsoever concerning the use of its products. The information as outlined above is to the best of our knowledge accurate, but it is not to be construed as a warranty, expressed or implied, of any kind concerning the use of this material.
